

House of EdTech (Goenka Kachave LLP)

AI Consultant

Full Time | Bengaluru / Kolkata / Pune / Hybrid

Role Overview

We are looking for high-energy AI Consultants who can lead enterprise AI transformation programs and workforce enablement bootcamps for corporate teams across functions including HR, Sales, Operations, Finance, Marketing, and Leadership.

This is not a traditional teaching role. You will work directly with enterprise teams to drive practical AI adoption inside organizations through live workshops, hands-on implementation, and productivity-focused AI workflows.

You will conduct engaging large-scale training sessions, solve real business bottlenecks using AI tools, and help organizations transform the way teams work using Generative AI.

Key Responsibilities

Lead Enterprise AI Transformation Programs

- Conduct high-impact AI bootcamps and workforce enablement sessions for corporate teams
- Deliver live online and offline training programs across multiple departments and business functions
- Drive end-to-end AI upskilling initiatives focused on practical workplace transformation
- Enable organizations to improve productivity through AI adoption at scale

Conduct High-Energy Live Workshops

- Facilitate engaging and interactive sessions for large enterprise audiences
- Handle department-specific Q&A sessions and solve employee AI-related doubts live
- Simplify complex AI concepts into practical, easy-to-understand workflows for non-technical audiences
- Maintain high facilitation energy and learner engagement across sessions

Solve Real Workplace Productivity Bottlenecks

- Identify repetitive workflows and inefficiencies within teams
- Demonstrate practical AI use cases that improve day-to-day business productivity
- Build and showcase AI-driven workflows for tasks across HR, Sales, Operations, Marketing, Finance, and Leadership functions
- Convert solved business problems into reusable AI playbooks and training assets

AI Workflow & Tool Application

- Stay updated with the latest AI tools, workflows, and productivity trends
- Apply Generative AI tools in practical business scenarios rather than theoretical demonstrations
- Train employees on real-world AI applications and implementation best practices
- Continuously experiment with emerging AI tools and workflow systems

Learning Enablement & Adoption Tracking

- Monitor LMS engagement, assignment completion, and learner participation
- Ensure employees successfully adopt AI workflows beyond the training sessions
- Support organizations in improving AI adoption and implementation outcomes
- Collaborate with internal teams to improve training effectiveness and learner experience

Stakeholder & Enterprise Engagement

- Work closely with enterprise stakeholders, HR teams, leadership groups, and CXO audiences
- Conduct large-scale Zoom sessions and offline workshops with confidence
- Build credibility with business leaders through practical and outcome-driven training delivery
- Represent House of EdTech during enterprise engagements and strategic AI initiatives

Required Skills & Qualifications

Core Skills

- Strong communication, presentation, and facilitation skills with the ability to engage large audiences
- Practical hands-on experience with Generative AI tools, workflows, and productivity systems
- Ability to simplify complex AI concepts for non-technical audiences
- Strong problem-solving mindset with comfort solving live business use cases
- Passion for teaching, facilitation, and content delivery
- High ownership, adaptability, and execution speed
- Comfort conducting both online and offline workshops
- Ability to handle interactive Q&A sessions and enterprise-level learner engagement

Professional Background

- 1–5 years of experience in training, facilitation, consulting, L&D, business operations, or related roles
- Education from a premier institution such as an IIT (B.Tech/Dual Degree) is strongly preferred
- Experience conducting corporate training sessions, workshops, or workforce enablement programs
- Familiarity with enterprise environments and business productivity workflows
- Understanding of business functions such as HR, Sales, Marketing, Operations, or Finance
- Exposure to large-scale training delivery and learner engagement management

Nice to Have

- Background in EdTech, consulting, startup operations, or workforce transformation
- Familiarity with AI productivity tools, automation platforms, and workflow systems
- Experience handling CXO stakeholders, leadership teams, or enterprise audiences
- Content creation experience across educational, professional, or productivity-focused formats
- Experience monitoring LMS engagement, assignments, and learner adoption metrics
- Exposure to building reusable AI playbooks, SOPs, or workflow documentation

Who Should Apply

This role is ideal for candidates who:

- Are passionate about AI adoption and workforce transformation
- Enjoy teaching practical business applications instead of theory-heavy concepts
- Can energize large audiences and simplify complex ideas effectively
- Are excited about AI, productivity, business transformation, and workplace innovation
- Enjoy solving real workplace productivity problems live during sessions
- Want to work directly with enterprise teams and create measurable impact
- Thrive in fast-paced, high-growth environments with high ownership

Why Join House of EdTech

- Work directly on large-scale enterprise AI transformation initiatives
- Train thousands of professionals across leading organizations
- Opportunity to become a leading voice in practical AI enablement
- High ownership with visible business impact
- Steep learning curve across AI, productivity, facilitation, and enterprise transformation
- Work closely with founders and senior leadership
- Be part of one of India's fastest-growing AI-focused EdTech ecosystems

About House of EdTech

House of EdTech (Goenka Kachave LLP) is a high-growth, multi-entity EdTech organization focused on delivering large-scale, outcome-driven professional education across high-impact domains including Artificial Intelligence, Finance, Data, Product Management, and Business Skills.

Founded by Aditya Goenka and Aditya Kachave, IIT Kharagpur alumni, the organization has rapidly emerged as one of India's most dynamic EdTech groups — combining cutting-edge curriculum, practitioner-led training, and performance-driven execution. With a learner-first philosophy and deep expertise in digital education delivery, House of EdTech enables working professionals and entrepreneurs to upskill, increase productivity, and unlock measurable career and income growth.

Today, the organization:

- Serves over 5 million learners across India and global markets
- Employs 1,500+ professionals across sales, marketing, tech, product, and operations
- Maintains a strong presence in Kolkata, Pune, and Bangalore
